SOLUTIONS BRIEF

Armor MDR

Adaptive defense against evolving threats

Navigate the digital threat landscape with a partner you can trust

Achieve unparalleled risk resilience with Armor Managed Detection and Response (MDR), designed to fortify enterprise defenses against the ever-evolving nature of cyber attacks.

Contextual Threat Prioritization and Response

By developing a unique enterprise risk profile per customer, this rich context empower Armor MDR to determine the pertinence and impact of potential security threats more effectively and swiftly neutralize potential threats before they escalate.

Analytics-Powered Security Strategies

By harnessing the power of artificial intelligence and machine learning, Armor's MDR service captures opportunities to accelerate incident response, leverage automation to enhance the TDIR process, and proactively improve security configurations.

Continuously Raising Defensibility

The insights from security incident triage and remediation are integrated into a feedback loop to update relevant security configurations, thereby significantly improving enterprise risk resiliency and threat prevention.

Why Armor MDR?

- Increase security ROI and reduce your costs by optimizing tool sets.
- Visibility and protection across endpoints, identities, cloud apps, emails, collaboration, tools and data.
- Minimize cyberattack damage with rapid and reliable TDIR powered by ML/AI.
- Augment your cybersecurity team and offload alert analysis to focus on core business.

> *In view of the modern sophistication of cyber threats, and current state of cybersecurity, adaptivity isn't just an advantage; it's the very foundation of digital defense.* ***Novel approaches like Armor MDR empowers enterprises to out-maneuver advanced threats*** *through proactive and adaptable defenses.*

A comprehensive approach to threat detection and remediation

Conventional MDR strategies are prone to tunnel vision, fixating on detection, neglecting the broader threat landscape and risk aperture of enterprises. Armor MDR addresses this critical gap by adopting an integrated risk management approach, integrating with industry-leading security platforms for unparalleled threat context – enabling high confidence triage, response and defense optimization.

CLOUD NATIVE SECURITY

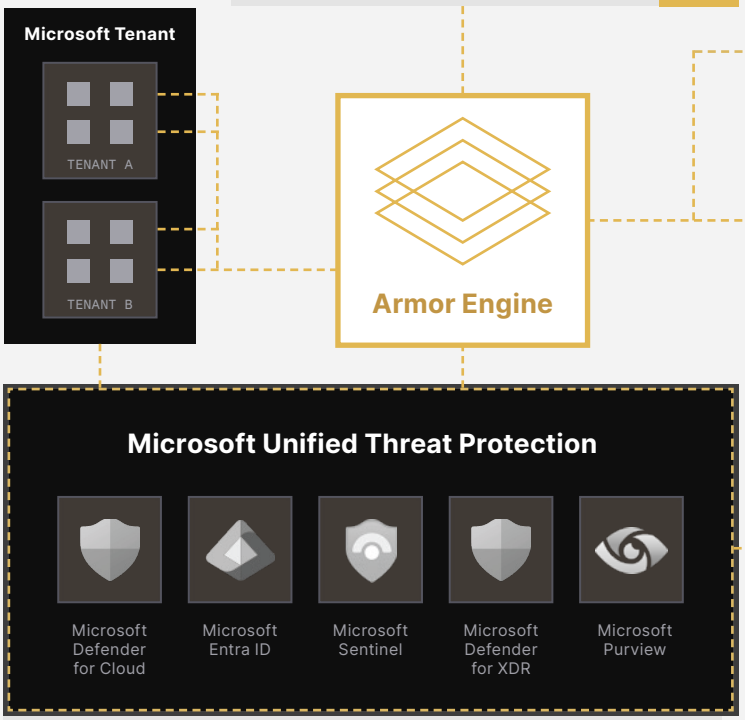
Deployment in customer tenant for complete visibility.

REPORTING

Monthly, quarterly, and annual reporting and reviews.

FEEDS

Enrichment and contextualization with reference data sets like threat intelligence, vulnerabilities and asset classifications data.



INCIDENT RESPONSE

Globally available SOC to perform investigation, proactive threat hunting and advanced forensics.

LOG SOURCES

Ingestion support for any log source natively supported by Microsoft or custom engineered by Armor for complete visibility.

Armor MDR can ingest any customer log source such as email, multi-cloud, IoT.

INTEGRATIONS

Continuous optimization and content updates for solution policies, configurations and content.

 |

Armor MDR features

Powered by expert security analysts and intelligent security analytics, Armor MDR continuously monitors your environment, proactively hunts adversaries and rapidly responds to threats.

About Armor

Armor is a global leader in cloud-native managed detection and response. Trusted by over 1,700 organizations across 40 countries, Armor delivers cybersecurity, compliance consulting, and 24×7 managed defense built for transparency, speed, and results. By combining human expertise with AI-driven precision, Armor safeguards critical environments to outpace evolving threats and build lasting resilience.
